MicroRNA-497 suppresses cell proliferation and induces apoptosis through targeting PBX3 in human multiple myeloma [Retraction]

Yu TH, Zhang XH, Zhang LR, Wang YL, Pan HJ, Xu ZH, Pang XC. *American Journal of Cancer Research*. 2016;6:2880-2889.

Recently we found that overexpression of miR-497 did not affect tumor growth of nude mice.

Thus, the results of in vivo are not able to reproduce in this study. All authors approve to retract this paper. We sincerely apologize for any inconvenience that might result from the retraction of this article.
