GPX3 hypermethylation serves as an independent prognostic biomarker in non-M3 acute myeloid leukemia [Retraction]

Zhou JD, Yao DM, Zhang YY, Ma JC, Wen XM, Yang J, Guo H, Chen Q, Lin J, Qian J. *American Journal of Cancer Research*. 2015;5:2047-2055.

The same paper entitled “GPX3 hypermethylation serves as an independent prognostic bio-

marker in non-M3 acute myeloid leukemia” was released in *American Journal of Cancer Research*. 2015;5:1786-1794. We must retract the same paper in *American Journal of Cancer Research*. 2015;5:2047-2055.
