Fujian Provincal Hospital Clinical Ethics

Research Committee

Ethics Research Number(K2016-01-001)

				,				
	Project Name	Serum level of visfatin and FGF21 in coronary artery disease patients						
	Funding	National Natural Science Foundation of China (81470021) and the Key						
_		Project of Cultivating Young Talent in Fujian provincial health and family						
Review		planning commission (2016-ZQN-8).						
project	Project	/	Time periods	Jan/2016Jan/2019				
	Numeber							
	Department	Cardiology	Project leader	Hai-feng Chen				
	Position	Cheif	Contact number	+86 13705930769				
Docum ents	1. Clinical research plan 2. Informed consent 3. Application of ethical review							
Methods		Quick review						
Results	According to the principles of Ethics review method involving human biomedical research of the Ministry of Health (2007), the Drug clinical trial management standard of cFDA (2003), the Medical device clinical trial regulation (2004), the Helsinki declaration (2008) and the International ethics guide for human biomedical research (2002), this clinical research and documents had be approved by the ethics committee.							
	Whether or not this research passed the ethical committee's review ✓ Yes □ No							
	Review frequency for this research □ Six months ☑ One year
