MicroRNA-494 inhibits proliferation and metastasis of osteosarcoma through repressing insulin receptor substrate-1 [Retraction]

Zhi XD, Wu K, Yu DS, Wang YS, Yu Y, Yan P, Lv G.
American Journal of Translational Research.
2016;8:3439-3447.

We recently found that miR-494 expression did not affect the expression of insulin receptor substrate-1 (IRS1), which is inconsistent with

the results we reported in this paper. In addition, some original data were missing. All authors have approved to retract this paper. We apologize to the readership of the Journal for any inconvenience caused.
