Achyranthes bidentata extract protects chondrocytes functions through suppressing glycolysis and apoptosis via MAPK/AKT signaling axis [Retraction]

Ma DJ, Li Y, Xiao W, Peng LP, Wang LX, Liao ZW, Hu LK. *American Journal of Translational Research*. 2020;12:142-152.

We would like to withdraw the manuscript entitled “Achyranthes Bidentata extract protects chondrocytes functions through suppressing glycolysis and apoptosis via MAPK/AKT signaling axis” (AJTR0099846R1) which was published in Am J Transl Res. 2020 Jan 15;12(1):142-152, for the following reasons:

1. The images were repeatedly used in Figure 2A, Figure 2E, and Figure 5B.
2. The analysis of WB images was not rigorous and there were significant scientific flaws.
3. There were also other mistakes in the text and images (Page 149, Figure 5E legend and Page 149, sub-title of Results). To avoid misleading the readers, we would like to retract this manuscript.
