# Targeting STAT3 signaling alleviates severity of fungal keratitis by suppressing ICAM-1 and IL-1 $\beta$ [Retraction]

Liu YY, Liu KX, Zhao GQ. *International Journal of Clinical and Experimental Medicine*. 2018; 11:8094-8101.

I recently found some technical problems in the paper, leading to some errors in the data collection, and the other authors do not agree to publish this paper, so I request that you withdraw the paper. The details are as follows:

The results described in Figures 3 and 4 cannot be reproduced in our subsequent studies, resulting in the experiment being unreproducible.

I would like to apologize for any inconvenience caused by the withdrawal of this paper. I hope there will be opportunities to cooperate with your journal in the future. Once again, thank you very much for your consideration and time.
