

Erratum

Xianfeng F. Zhao. Pitfalls in Diagnostic Hematopathology: Part I. Int J Clin Exp Pathol. 2009; 2(1): 11–20.

On page 12, in the sentence interpreting the data of Table 2, the median survival months of CLL/SLL memory B-cells (293 months) and naïve B-cells (109 months) were mistakenly switched. However the data in Table 2 is correct. The conclusion is not adversely affected by this error.
